

Entry Enhancement Committee

Annual Report to the 2019 MPHA AGM

The Entry Committee reports the following:

- Two trail cameras purchased with SD cards and AA batteries.
- One trail cam installed at the garbage shed location.
- The additional trail cam to be installed near the Red Shirt Road gate.*
- Four surveillance warning signs installed along Parklands road to the Red Shirt Road gate.
- The condition of the garbage shed is being assessed with the most noticeable item for repair/replacement being the shed door that had been damaged by bears.**
- Removal and replacement of signs attached to our main sign to be completed this summer along with general clean-up around the gate and shed.

*Looking for a suitable tree that would be accessible for maintenance of camera media/batteries etc.

**Although the shed looks to be in need of repair, it is still structurally sound at least for the next few years. Shed door will require the purchase of one sheet of 3/4" plywood and some support lumber. The door hardware can be re-used. General cleaning of the area around the foundation could be all that is needed to "air-out" and prevent further rot.
